1964

To the Mayor, Aldermen and Councillors of the Borough of Berwick-upon-Tweed

Mr. Mayor, Ladies and Gentlemen,

I have the honour to present to you my Annual Report on the health and sanitary conditions of the Borough for the year 1964.

The vital statistics show no great change from previous years. The birth rate however, is lower than in 1963, although the rate expressed per 1,000 of the population was still above the national average.

It is satisfactory to record that the stillbirth and infant death rates were low and in the main, represent the hard core of infant mortality which is due to congenital defects.

The overall death rate showed a slight rise from the previous year and was in fact higher than the national rate, but with the comparatively small figures involved, such year to year fluctuations are bound to occur, and are not significant. More than half the deaths were due to cardio vascular causes and one death in seven resulted from malignant disease.

There is little to report concerning infectious diseases. A few cases of measles occurred and two pulmonary tuberculosis notifications were received. This was a reduction upon the previous year, when there were five cases in the Borough during 1963.

The immunisation and vaccination rates for the Borough continues at a very satisfactory level. This is in no small measure due to the enthusiasm of the family doctors and the clinic staff.

The Public Health Inspector's Report lists the extent of the work carried out during the year.

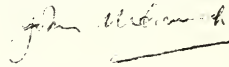

The number of Discretionary Grants approved were very similar to those of the previous year, and although I feel that this number could be much larger, it is evidence that slow but steady progress is being made in this helpful method of improving property in the town.

It is satisfactory to observe that the caravan sites in the Borough are well run. The increasing popularity of caravanning makes it imperative that high standards of hygiene are observed in large caravan sites.

An important item of legislation that occurred in 1963 was the Offices, Shops and Railway Premises Act. The purpose of this legislation is to improve standards existing in commercial premises, which in many areas have been very poor. A start has been made in implementing this legislation.

In conclusion, I would like to express my thanks to the Council for their interest, to the Members of the Health Committee, to the Clerk of the Council, and to the Public Health Inspector for their help during the year.

I have the honour to be,
Mr. Mayor, Ladies and Gentlemen,
Your obedient servant,

Medical Officer of Health

GENERAL STATISTICS

The area of the district was 7,126 acres.

The number of inhabited houses was 4,219.

The rateable value was £363,335 and the sum represented by a penny rate was £1,375.

The estimated mid-year population was 11,840 and this figure was taken when calculating the Birth and Death rate.

VITAL STATISTICS

<u>Live Births</u>	<u>Males</u>	<u>Females</u>	<u>Total</u>
Legitimate	120	119	239

Booster dose oral after 2 Salk Injections	34
Booster dose oral after 3 Salk Injections	1179
Booster dose oral after 3 Oral doses	125

ANNUAL REPORT OF THE PUBLIC HEALTH INSPECTOR1964To the Mayor, Aldermen and Councillors of the Borough of Berwick-upon-Tweed

Mr. Mayor, Alderman Mrs. Adams and Gentlemen,

It is my pleasure to present my Annual Report for 1964 which has been compiled in accordance with Ministry of Health Circular 1/65. Work during the year has followed a normal pattern except for the introduction of duties consequent upon the Offices, Shops and Railway Premises Act, 1963 coming into operation.

I take this opportunity of expressing thanks to members of the Council, colleagues in other departments, the Medical Officer of Health and my staff for co-operation and assistance given during the year.

I have the honour to be,
Your obedient servant,

D. S. HALLEY

Public Health Inspector

WATER SUPPLY

Since taking over the Council's water undertaking in 1963, no major changes or extensions to water mains have been made by the Newcastle and Gateshead Water Company. This Company has taken 24 samples of water from various points in the Borough and after bacteriological examination these were all classified as of excellent quality. No complaints of shortage of water were received.

The position at the end of the year regarding supply of water to domestic premises was as follows:-

	Number of houses	Approximate Population
Water supply in house	4,175	11,690
By standpipe	22	75
By other means	22	75

SEWERAGE

No extensions were made to the sewers in the Borough. One sewer outfall near the mouth of the River Tweed proved troublesome because of flood water and high tides moving sand banks and causing silting-up at the sewer ending.

COMMON LODGING HOUSES

There are no common lodging houses in the Borough.

PREVENTION OF DAMAGE BY PESTS ACT, 1949

One part-time operator was employed by the Council. Fluoroacetamide continued to be used to poison rats in sewers with satisfactory results. Three sewer treatments were carried out and one test baiting of manholes undertaken. In the latter case 7 of the 42 manholes baited showed 'takes'. Visits to infested premises numbered 466 and another 1,087 premises were surveyed. One statutory notice was served and complied with.

PUBLIC HEALTH ACT, 1961 - SECTION 74 - PIGEONS

Work continued on the destruction of pigeons, a total of 1,514 birds being accounted for during "treatments".

FACTORIES ACT, 1961

In Appendix 2 of this report is set out the tabulated information required by the Ministry of Health.

THE RAG FLOCK AND OTHER FILLING MATERIALS REGULATIONS, 1961

No changes have occurred in registrations, there being only three premises registered in the Borough. One sample of hair sent for examination was reported upon as complying with the cleanliness standards under the Regulations.

HOUSING

A total of 310 inspections were made of houses, the majority of these being in connection with the 'Points Scheme' for the allocation of Council houses.

One Demolition Order and two Closing Orders were made and in several cases demolition was carried out by the Council in default of owners of property under Demolition Orders.

The improvement of older houses by grant continued to be encouraged and the following shows the position as at the close of 1964.

DISCRETIONARY GRANTS

	<u>No. of separate houses</u>
Applications received during year	18
Applications rejected	2
Applications approved	16
Approximate average grant per house	£241
Total number of houses approved for grant since inception of scheme	150

STANDARD GRANTS

	<u>During the year</u>	<u>Total to date</u>
Number of separate houses for which grants have been made	6	27
Number of houses provided with:-		
a) Bath or shower	6	25
b) Wash hand basin	6	25
c) Hot water supply	6	21
d) Water closet	6	25
e) Food store	4	20

There are still 420 families sharing sanitary accommodation and at 31 houses chemical or pail closets are in use. The incidence of shared W.C. accommodation is as follows:-

<u>Number of families sharing one W.C.</u>	<u>Number of Cases</u>	<u>Total number of families concerned</u>
2	170	340
3	20	60
4	5	20
	Total at 31.12.64	420
	Total at 31.12.63	447

CARAVAN SITES AND CONTROL OF DEVELOPMENT ACT, 1960

Under the provisions of this Act, 33 inspections were made, these were not only to the four licensed sites in the Borough but in connection with the use of land without a licence. When the most recently licensed site is fully developed there will be provision for a total of 274 holiday caravans on these sites.

INSPECTION OF FOOD AND FOOD PREMISES

To the four slaughterhouses, 854 visits were made to inspect meat and 72 other inspections were made concerning food examination. A total of 12 tons. 1 cwt. 3 qrs. 1 st. 8 lbs. 7 ozs. of food was condemned as being unfit for human consumption. Inspections under the Food Hygiene (General) Regulations, 1960 numbered 74 and 17 informal notices were sent in this connection.

There were 27 slaughtermen licensed during the year.

Following upon the Aberdeen typhoid outbreak, 309 contacts by telephone were made with food firms and 78 visits carried out. A total of 493 - 6 lb. tins of corned beef were examined and of these 269 were withdrawn. Food handlers who had contact with Aberdeen or with persons from that City were interviewed and, where necessary, blood or faecal specimens were sent for laboratory examination. Negative results were obtained.

Investigation was also carried out following an alleged minor outbreak of food poisoning in a food factory. Despite extensive inquiry and laboratory examination of suspected food and of faecal specimens, no reason for the occurrence was found. Eighteen visits were made in this connection.

In addition to visits made to premises where ice cream is manufactured, 43 samples of this product were taken with the following results:-

Grade I - 37, Grade II - 1, Grade III - 3, Grade IV - 2

No specific reason was found for the low grade samples but subsequent sampling of the ice cream proved satisfactory.

CLEAN AIR ACT, 1956

Work under this Act calls for little comment as it forms no health hazard to the population. Four routine observations were made on one factory chimney.

PUBLIC HEALTH SHIP REGULATIONS 1952

The prescribed form concerning shipping entering Tweed Dock will be found in Appendix 6 of this report. No cases of infectious disease were notified and de-ratting certificates were in order.

OFFICES, SHOPS AND RAILWAY PREMISES ACT, 1963

Work under this Act mainly concerned publicity, registration of premises, and dealing with queries. A start was made on general inspections but from Appendix 7 it will be seen that much remains to be done, there being 214 premises registered at the end of the year and only 9 general inspections being possible.

SHOPS ACT, 1950

Under the provisions of this Act, 42 inspections were undertaken and no serious contraventions were found. There were 271 shops in the Borough at the close of the year.

THE PETROLEUM (REGULATIONS) ACTS, 1928 and 1936

There were 68 inspections made to licensed premises under the Act, 7 Ullage tests were satisfactorily carried out and 3 flash point tests undertaken. In the month of December, 29 petroleum licenses and 8 licenses for petroleum mixture were issued.

The total petroleum storage licensed amounted to 57,713 gallons and for petroleum mixtures it totalled 1,170 gallons.
